

Mise en place d'un serveur PXE - iVentoy

2026

X

Maxence Dalibout--Lovato

1. Mise en place d'une machine debian sur le réseau gsb nommé PXE-1.1.

2. Téléchargement du projet github iVentoy sur la machine virtuelle. iVentoy 1.0.21 release Latest

Attention that:

iVentoy and Ventoy are two completely different softwares.

Name	Official Website	Open Source	Edition	Use Case
Ventoy	https://www.ventoy.net	100% open source	Only open source edition	Install OS through USB/HDisk
iVentoy	https://www.iventoy.com	part open source part closed source	Free-Edition Pro-Edition	Install OS through network(PXE)

This repo only contains the open source part of iVentoy.

So you should decide to use it or not.

Changelog:

1. Delete the sig httpdisk driver file.
2. Add document in README for httpdisk driver file.

 Source code (tar.gz)		May 7, 2025

3. Transformation du dossier compressé en service linux.

4. Configuration d'iVentoy depuis l'interface web.

The screenshot shows the iVentoy Free web interface. The top bar is blue with the iVentoy logo and 'iVentoy Free' text. A green status bar below it says 'iVentoy is running now'. On the right, there are links for 'Donation' and 'Official'. The left sidebar is dark grey with menu items: 'Boot Information', 'Configuration', 'MAC Filter', 'Image Management', and 'Register Information'. The main content area is titled 'Boot Information' and shows the 'IP Configuration' section. It includes fields for 'Select Server IP' (10.2.2.4), 'Subnet Mask' (255.255.255.0), 'IP Pool (begin)' (10.2.2.200), 'DNS Server' (Optional, can leave), 'NIC Name' (eth0), 'GateWay' (10.2.2.1), and 'IP Pool (end)' (10.2.2.219). A red square icon and a green 'RUNNING' button are also visible.

5. Téléchargement des iso dans le dossier du service sur la machine.

6. Créations des scripts d'installations des iso.

7. Essaie de l'installation automatique.
